Pothera CMMS

Computerized Maintenance Management System

Presenting Pothera CMMS, a world-class computerized maintenance management system. It centralizes the maintenance processes and facilitates workflow, by automating work orders and monitoring these, to ensure enhanced up-time and timely preventive upkeep. It also helps you to track tasks and proportion resources to improve overall maintenance productivity.

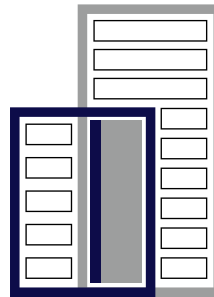

Pothera CMMS integrates all your maintenance processes, helps you remain proactive, elevates customer service promptness, and allows you to address potential concerns and make informed decisions across your maintenance operations chain.

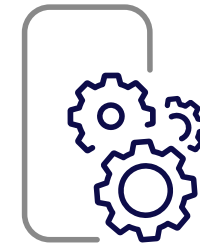

It enables a holistic overview of maintenance operations to generate data driven, actionable solutions for reactive, preventive and predictive issues before they escalate into expensive downtime.

On Premises

Mobile Options

Explore our cloud based, on-premise or mobile options and equip your maintenance strategy with the Pothera CMMS advantage.

Pothera

CMMS

Computerized Maintenance Management System

Exclude 100% of paper off your desk with our CMMS.

Prioritize work orders and increase productivity by 39% with task scheduling.

Reduce equipment downtime by 41% with preventive maintenance.

Reduce part spend by 29% with spare parts inventory.

Increase asset lifespan by 23% with our world-class CMMS.

Your Advantage Every Day

Pothera CMMS software features a range of modules, each tailored to address specific business needs and functions. While some modules are universally applicable across all industries, others are uniquely designed for specialized requirements. This modular approach provides the flexibility to seamlessly scale your operations as your business grows or diversifies.

MODULES

Asset Management

- Power Assets with Performance.
- Integrate and centralize asset information in a unified whole.
- Enable a holistic overview of your assets from maintenance history, performance data, SOPs, lifecycle information, and more for optimized asset maintenance.
- Track equipment usage and automate work orders with real time responsive readiness.

Work Order Management

- Submit objective and clarity driven work orders to optimize resource utilisation and boost efficiency.
- Schedule, manage and track work orders, with attached SOPs, job lists, and suggested actions to be performed.
- Warranty management.
- AMC/CMC management.

Preventive Maintenance Scheduling

- Automate maintenance schedules to prevent equipment failure, improve operational efficiency and enhance the lifespan of assets.

Complaint Management

- Easily manage complaints and track their resolutions.
- IVR Integration for auto-assigning of the complaint or enquiry to the concerned engineers & team leader.
- Complaint Allocation / Re-Allocation to relevant personnel for resolution.

Vendor Management & Service Reporting

- Single system to coordinate relationships with external vendors, including tracking contracts, performance, and service histories.
- Automatically send notifications via email, SMS, and WhatsApp, in response to arising needs.
- Dashboard for visual overview of important metrics and detailed reporting.

Inventory Management

- Reduce human errors by maintaining automated inventory of parts and spares needed for maintenance.
- Ensure optimal stock levels of spare parts and consumables and negate the chances of stockouts or overstocking.

Reporting and Analytics

- Access maintenance data as and when you need it, and convert it into actionable insights.
- Access a panoramic overview of maintenance yardsticks across sites, projects, assets and users.

Mobile Access

- Access or update your maintenance operations on-the-go via mobile devices and gain the flexibility to manage tasks from the location of your choice.

UNPARALLELED SOFTWARE. UNMATCHED BENEFITS.

With ultimate ease of use, manage your work, PMs, parts, equipment, people, and purchasing to increase productivity, reduce downtime, and save time and money.

KEY BENEFITS

Improved Equipment Performance Reliability

Regular maintenance and tracking of equipment prevent breakdowns and improves equipment life. This increases the performance reliability quotient of operations.

KEY BENEFITS

Regulatory Compliance

Ensures accurate history of maintenance activities and schedules timely inspections and audits, which enables and facilitates regulatory compliance.

Increased Worker Productivity

As all processes are automated and digitized, the team is relatively left with ample extra time to look after the main areas affecting business growth.

Enhanced Overall Productivity

Automated maintenance process allows the talent pool to dedicate more time to the core areas of business resulting in a quantum boost in productivity.

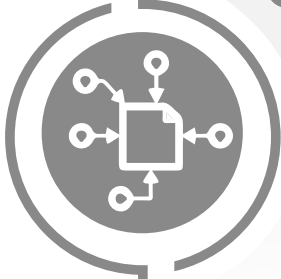

Increased Visibility & Transparency

Tracks and monitors work assignments and how these are carried out, providing visibility into workload and performance of the team. It also tracks assets, so the stakeholders have information about asset health.

KEY BENEFITS

Data Driven Decision Making

Collates data from everyday operations and converts it into automated intelligence enabling improved forecasting, planning, and resource allocation.

Improved Asset Availability

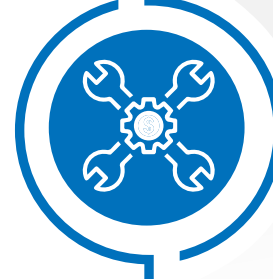

Ability to maintain detailed records of all assets, such as maintenance history, performance metrics, and lifecycle data. This improves your asset management and capital planning quotient.

Automated Key Business Processes

The entire maintenance operational set up is automated and paperwork or human errors are minimized by the highest percentile.

Improved Maintenance Cost Control

Preventive maintenance management cuts expenses on superfluous maintenance activities. This minimizes unnecessary expenses as every step is neatly planned and coordinated.

What Makes Pothera CMMS An Optimal Choice For Your Business?

Here are the key differences between Pothera CMMS and any other ordinary software:

These distinctions highlight how Pothera CMMS is purpose-built to optimize maintenance operations and improve overall efficiency compared to more generalized software solutions.

KEY DIFFERENTIATORS

Industry-Specific Focus

Pothera CMMS is tailored specifically for maintenance management across industries, whereas ordinary software may have a broader, less specialized focus.

Maintenance Workflow Integration

It seamlessly integrates maintenance workflows, including work orders, asset management, and preventive maintenance scheduling, unlike ordinary software that may not prioritize these functionalities.

KEY DIFFERENTIATORS

Asset Tracking and Management

Provides robust tools for tracking and managing assets throughout their lifecycle, ensuring optimal performance and longevity, which ordinary software may not emphasize.

Compliance and Regulatory Support

Offers features to ensure compliance with industry regulations and standards, a critical aspect that ordinary software may not address adequately.

KEY DIFFERENTIATORS

Real-Time Data and Reporting

Enables real-time data collection, analysis, and reporting on maintenance activities and asset performance, enhancing decision-making and operational efficiency beyond what ordinary software typically provides.

Customization and Scalability

Designed to be highly customizable and scalable to meet specific business needs and growth requirements, whereas ordinary software may offer limited customization options.
